

My name is Abu Musab Al-Zarqawi, which means "father of Musab, the guy from Zarqa" and I am here because some of you might not believe the heroic Bully George killed me again. Some of you might believe I don't exist or was killed over three years ago in the first bombing raid on Iraq. Some of you may even believe that Bully George is just pretending he killed me a fourth time to get Haditha off magazine covers and to boost his ratings. Now there is a simple explanation for how I could die four times. Guys from Zarqa have 15 lives. Has this Bully George ever lied to you?

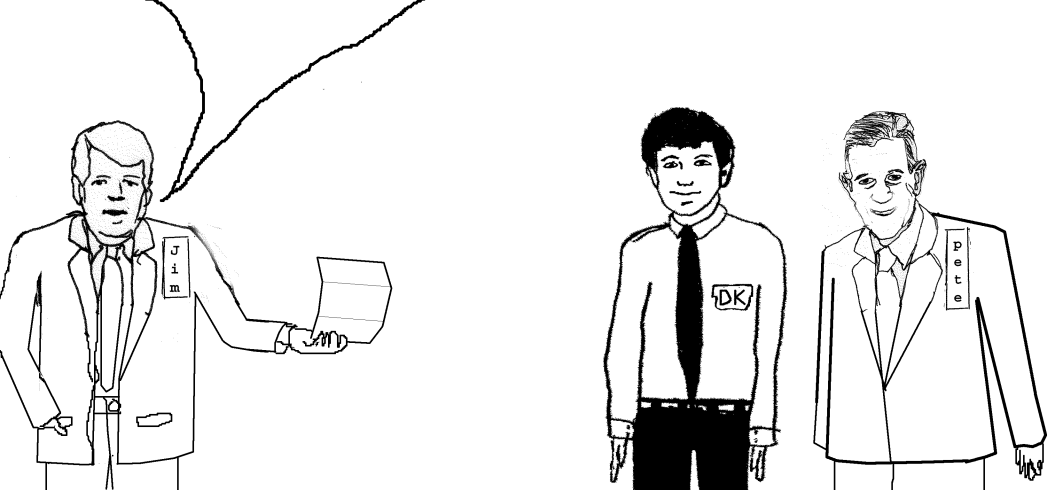

I voted twice for war with Iran, twice to nuke California, for war with the Palestinians, and to give hundreds of billions to Halliburton. I just removed a Democrat from his committee without any proof of wrongdoing. Maybe, I should remove all Democrats from all the committees. After all, I just want to make my hero, Bully George, happy.

Bully George  
My Idol

I have a letter that may explain what happened to the Senators. It says that Bully George and Heartless Dick implanted their brains with mind control devices and that Bully George has the remote controls to their brains. The letter contains a copy of the schematics for an implant and corresponding remote control. It also has a list of frequencies and names of Senators. The letter is signed "Anonymous" but the return address reads "Jenna and Barbara, 1600 Pennsylvania Avenue."

If this is for real and not a trap, it could explain the odd way the Senators are behaving. But what about Nancy and the House Democrats who keep voting for war with Iran?

I have a theory about that. But first, let's check out this information about those mind-control devices.

I'll follow the schematics and put together one of these controls and by next week we'll know whether these Senators are just stupid or if someone else is controlling them.
